

Online Grocery Delivery System

Team : Antara Kolar , Hariram Natarajan , Shriya Rodi

Title: QuickShop

Description:

This is an online grocery delivery system. Each customer will have their own account. There will be multiple supermarket retailers options (Safeway, Whole Foods Market, King Soopers) where sellers can list and add their products. Customers can select the retailer and add groceries to their cart. Customers can view products, buy, rate and review products and stores. Products will have options of home delivery and take away.

Actors: Sellers, Administrator, Customers.
